Press release

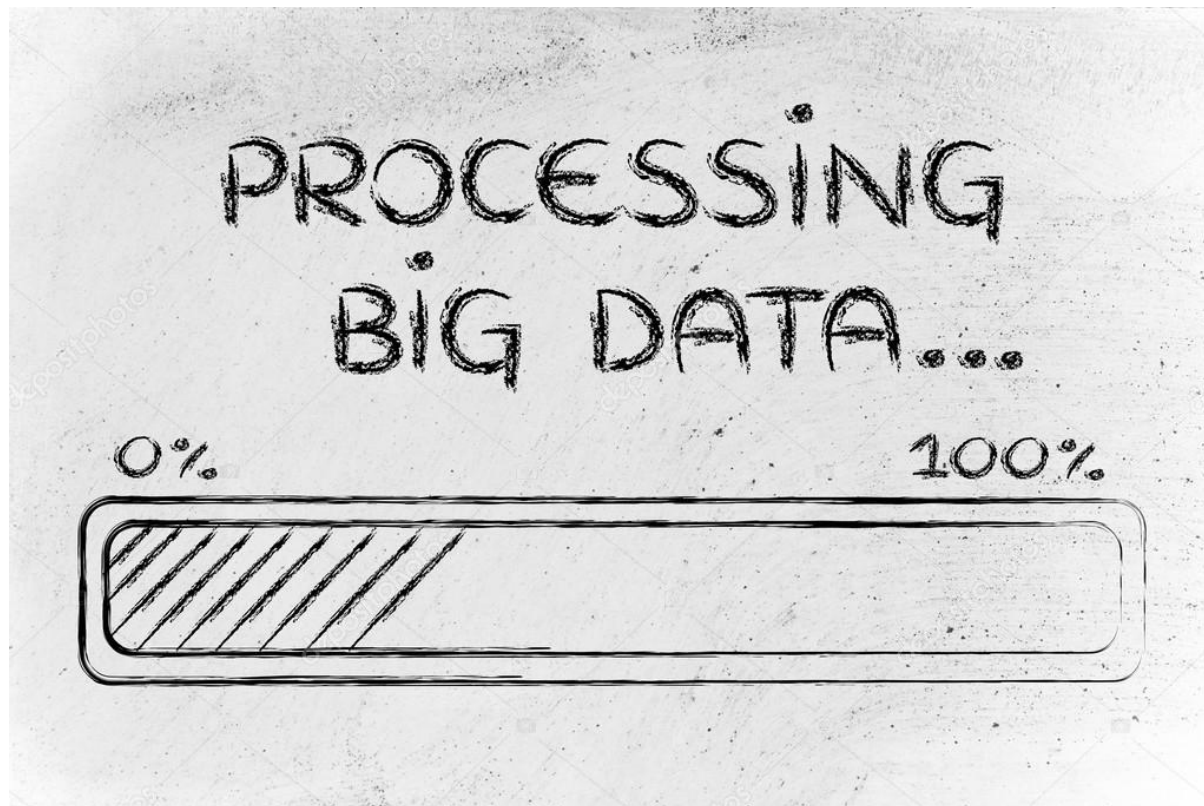

Vade • March 24, 2022 • 11 min

Newly patented technology disarms a kit's ability to conceal itself

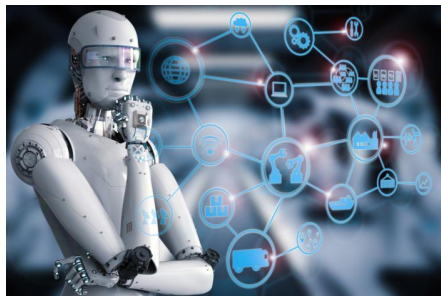

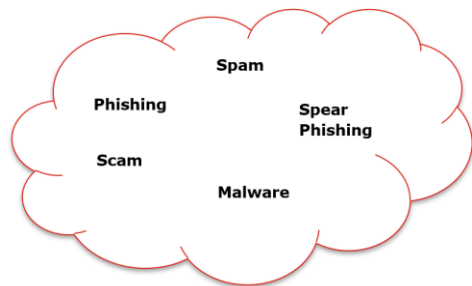

San Francisco, CA – March 23, 2022 –Vade, the global leader in threat detection and response with 1 billion mailboxes protected worldwide, today announced that it has been awarded a new patent by the US Patent and Trademark Office (USPTO). Vade's latest patented invention is a new method of preventing phishing kits from initiating defensive actions when examined by URL scanning technology.

This new method of subverting defensive actions from phishing kits is incorporated into all of Vade's products and paves the way for better phishing detection and prevention. "Vade's latest patent," said **Sébastien Goutal, Chief Science Officer at Vade and co-**

The screenshot displays the 'Threat Coach' interface for M365. A modal dialog titled 'Launch campaign' is open in the center. The dialog contains the following elements:

- Title:** Launch campaign (with a close icon)
- Text:** Send a training to a group of users
- Form:** 'Select the recipients' with an input field and a clear (X) button.
- Form:** 'Select the brand' with a dropdown menu.
- Text:** Add the following address to your whitelist to ensure that users receive the training emails: `noreply@m365.eu.vadesecond.com`
- Buttons:** 'Close' and 'Launch campaign' (highlighted in blue).

The background interface shows the 'Threat Coach' overview with a 'Launch campaign' button in the top right, a '7 days' filter, and a table with columns for 'DATE & TIME', 'COMPLETED', 'FAILED', and 'DETAILS'. A message at the bottom of the page reads 'It seems pretty quiet here.'
